

STATE COUNCIL OF EDUCATIONAL RESEARCH AND TRAINING -CHENNAI – 06

TNCF – 2017 – DRAFT SYLLABUS – MATHEMATICS

STANDARD 1 -10

GRADATION OF PRIMARY MATH CONTENT

TOPIC	CLASS 1	CLASS 2	CLASS 3	CLASS 4	CLASS 5
GEOMETRY	<p>Introduction to spatial orientation</p> <ul style="list-style-type: none"> To build a sense of spatial orientation. To understand spatial relationship. To understand the meaning of and use appropriate spatial vocabulary <i>Eg. Top, Bottom, On, Under, Inside, Outside, Above, Below, Near, Far, Before, After, Front - Rear , More -Less, Thin - Fat and Big - Small</i> <p>Introduction to shapes in real objects and its attributes</p> <ul style="list-style-type: none"> To correlate concrete things to their shapes To Learn vocabulary related to nature of shapes <i>Eg. Shapes, round, corner, edge, surface, plain, long & short.</i> <p>Introduction to basic shapes (2D)</p>	<p>Introduction to spatial orientation- 3D dimensional</p> <ul style="list-style-type: none"> To observe objects in the environment and gets an intuitive feel for their geometrical attributes <p>Identification of 2D shapes and 3D objects in everyday life</p> <ul style="list-style-type: none"> To identify the basic 3D shapes such as cube, cuboid, cylinder, cylindrical, cone, conical, sphere and spherical by their names. <p>Introduction to properties of shapes</p> <ul style="list-style-type: none"> To trace the 2-D outlines of 3-D objects. To Observe and identify these 2-D shapes viz., rectangle, square, triangle, circle by their names with 3 D objects To describe intuitively the properties of these 2-D shapes. 	<p>Creating 2 – D shapes</p> <ul style="list-style-type: none"> To create shapes through paper folding, paper cutting To identify 2-D shapes. To describe the various 2-D shapes by counting their sides ,corners (vertices)and diagonals To make shapes on the dot-grid using straight lines and curves. <p>Tangram</p> <ul style="list-style-type: none"> Create shapes using tangram pieces Matches the properties of 2D shapes by observing their sides and corners (Vertices) To tile a given region using a tile of a given shape Distinguishes between shapes that tile and that do not tile <p>constructing 3 – D objects</p> <ul style="list-style-type: none"> To be able to draw 3-D objects. Describe the various 3D shapes by counting their sides, corners and diagonals 	<p>Properties of 2 – D shaped objects</p> <ul style="list-style-type: none"> To learn names of shapes like triangle, square, rectangle, pentagon, circle etc., To recognize these shapes in the objects around them. Able to draw circles using objects like bangles , bottle caps etc., Able to draw a 2D shapes free hand and with geometry tools. To identify centre, radius and diameter of a circle. To identify sides, diagonal, perimeter for a quadrilateral objects. To measure and find out the differences among different quadrilateral objects To understand the properties of 2D objects <p>Creating shapes by combining different 2 – D shapes</p> <ul style="list-style-type: none"> Uses Tangram to create different shapes. 	<p>Drawing 3–D shapes from 2–D Shapes</p> <ul style="list-style-type: none"> To get the feel of perspective while observing drawings of 3-D objects in 2-D. Able to explore intuitively rotations and reflections of familiar 2-D shapes. Able to explore intuitively symmetry in familiar 3-D shapes like in alphabets. Able to make the shapes of cubes, cylinders and cones using nets especially designed for this purpose <p>Introduction to angles</p> <ul style="list-style-type: none"> To get the feel of an angle through observation of objects in their environment and paper folding.

	<ul style="list-style-type: none"> To know basic names of shapes like square, circle, oval, rectangle, triangle To observe and describe objects from the surroundings having different sizes and shapes like pebbles, boxes, balls, pipes, bottle caps, pencil and eraser. To draw the border of objects and represent in 2D <i>(Eg. Draw rectangle with border of eraser/pencil box)</i> <p>Introduction to draw straight lines</p> <ul style="list-style-type: none"> To draw horizontal, vertical and slant lines (free hand) To draw /represent straight lines in various orientations(vertical, horizontal, slant) <p>Differentiating,Sorting and classifying object based on shapes, locations and space</p> <ul style="list-style-type: none"> To collect objects from the surroundings and differentiates, Sorts, classifies and describes those objects on the basis of shapes and other observable properties <i>Eg .Sound produced by group of students within outside the class, same done by one child (within the class and outside the class).</i> Observes and describes the way shapes affect 	<ul style="list-style-type: none"> To identify objects by blind folded and to use the vocabulary such as curve, straight line, circle, cylinder, sphere, cone, square, rectangle, triangle, circle , corner etc. <p>Introduction to draw different kind of lines and figures of 2D and 3D.</p> <ul style="list-style-type: none"> Identifies and makes straight lines by folding, straight edged objects, stretched strings and draws free hand and with a ruler To distinguish between straight and curved lines To identify objects by observing their shadows 		<ul style="list-style-type: none"> Able to fill space using tiles of geometrical shapes using one or two shapes Able to choose a tile among a given number of tiles that can tile a given region both intuitively and experimentally. <p>Properties of 3 – D objects</p> <ul style="list-style-type: none"> To create 3D objects using Clay and paper folding given nets To compare and differentiate 2D and 3D objects <p>Introduction to Symmetry</p> <ul style="list-style-type: none"> Able to explore intuitively the reflections through mirror, ink blots, paper cutting and paper folding. Able to draw top view, front view and side view of simple objects. To observe from the surrounding and from day to day life situations and identifies symmetrical objects. Eg: Vertical dissection of human body (externally), butterfly, petals of flowers, design of a fabric, starfish etc. Collects/ records symmetrical objects whenever/ wherever they see To draw such symmetrical objects and naming the same. 	<ul style="list-style-type: none"> To learn the names of angles like acute, obtuse and right angle. Able to identify right angles in the environment. Able to classify angles into right, acute and obtuse angles. To represent right angle, acute angle and obtuse angle by drawing through tracing. <p>Area and perimeter(to be given in activities only)</p> <ul style="list-style-type: none"> to determine area and perimeter of simple geometrical figures (such as rectangle/square using standard units) <p>Introduction to Fractals</p> <ul style="list-style-type: none"> Observes and understands fractals <p>Create model of fractals using clay, paper, glue and match sticks</p>
--	---	---	--	--	---

	movements like rolling and sliding.			Iterative patterns in shapes <ul style="list-style-type: none"> • Able to draw circles, spirals, ovals; • To differentiate and to compares the shapes drawn. • To explore visual examples of repeating patterns. 	
NUMBERS	Numbers from 1 to 9 <ul style="list-style-type: none"> • To observe objects and make collection of objects • To arrange the collection of objects in order by <ul style="list-style-type: none"> – Matching and – One to one correspondence • To count the number of real objects in a collection.(concrete) • To count the number of objects by representing them in the form of pictures(semi-concrete) • To make collection of objects corresponding to a specific number • To recognize and speak numbers from 1 to 9. • To use numbers from 1 to 9 in counting and comparison. (Real objects and repeated events like clapping/jumpingto be used for counting) • To read and write numerals from 1 to 9. • To identify the ordinal 	Numbers from 21 to 99 <ul style="list-style-type: none"> • To learn numbers by rote from 21 to 99. • Write numerals for Twenty-one to Ninety nine. Counting <ul style="list-style-type: none"> • <i>Group objects</i> in category.(eg: group the names based on alphabets) • Count the objects in each category(eg: count the number of number of students name starting “A”, number of students name starting “B”...) • To group objects into ‘tens’ and ‘ones’ • To draw representation for groups of tens and ones • To group a number into tens and ones • To identify the predecessor and successor up to 99. • To identify numbers” in between” Eg: 24, __, 26. • To skip count by twos forward to backward up 	Numbers sequence up to 1000 <ul style="list-style-type: none"> • To read and write all 3-digit numbers. • To expands a number with respect to place values • Counts in different ways – starting from any number Compare Numbers <ul style="list-style-type: none"> • To identify odd and even numbers with respect to ones place upto 3 digit numbers • To be able to forms greatest and smallest numbers using given digits. • To be able to sort an array of numbers into ascending and descending order Ordering <ul style="list-style-type: none"> • To arrange things in different orders for a given solution.(eg: finding out different ways to prove that 3 and 5 make 8, by arranging numbers in different orders) Addition and Subtraction within 1000 <ul style="list-style-type: none"> • Able to add and subtract numbers by writing them vertically in the following two cases: (Sum should not exceed 1000) 	Number Sequence up to 10000 <ul style="list-style-type: none"> • To read and write 4 – digit numbers (including odd and even numbers) • To write numbers with respect to place value expansion. Comparing numbers <ul style="list-style-type: none"> • Able to sequence an arbitrary array of numbers in ascending and descending order. • Able to form greatest and smallest numbers using given digits Addition and subtraction within 10,000 <ul style="list-style-type: none"> • To add and subtract up to four digit numbers by writing them vertically in the following two cases: without grouping, with grouping (sum should not exceed 10,000). Multiplication (up to 2 digit number by 2 digit number and 3 digit number by single digit number) <ul style="list-style-type: none"> • Able to do elementary multiplication of 2-digit by 2-digit and 3- digit by single digit numbers using lattice algorithm and the standard 	Numbers beyond 10000 <ul style="list-style-type: none"> • to know numbers beyond 1000 being used in real life situation Place value and comparing numbers <ul style="list-style-type: none"> • To find place value in numbers beyond 10000. • Able to sequence an arbitrary array of numbers up to five digits in ascending and descending orders. • To form the greatest and smallest numbers using four and five digits. Numbers and operations <ul style="list-style-type: none"> • To appreciate the role of place value in addition, subtraction and multiplication algorithms. • To multiply 3 digits by 2 digits • to use informal and standard division algorithm • To divide 4 digits by 2digits

	<p>numbers from 1 to 9</p> <ul style="list-style-type: none"> To match the ordinal numbers with objects in order of size <p>Concept of “Zero”</p> <ul style="list-style-type: none"> To introduce the concept of “no objects” give the symbol zero to represent it. To approach zero through real life situation (such as there are 5 papers lying on the floor, how many remaining? Or there are 5 waste papers lying on the floor, ask the child to put in the garbage bin one by one. Let the children count and say eg: 1 in the bin, 4 on the floor,finally nothing or zero on the floor, 5 in the bin). <p>Introduction to Number 10 To know and use the number 10</p> <p>Counting</p> <ul style="list-style-type: none"> To count the objects.(Eg: count the number of books in the bag; the child should be able to tell the total and ensures that the child has counted everything once) To estimate, verify and justify the counted value. To be able to count the objects, mentally & silently; To be able to relate last number counted with the 	<p>to Ninety-nine.</p> <ul style="list-style-type: none"> To skip count by threes forward to backward up to Ninety-nine To introduce odd and even numbers <p>Ordering</p> <ul style="list-style-type: none"> To arrange numbers till hundred in ascending and descending order To able to form the greatest and the smallest 2-digit numbers with and without repetition of given digits. To arrange things in sequential order. (eg: arrange names of the classmates, alphabetically). <p>Place value and comparing the numbers</p> <ul style="list-style-type: none"> To expand a number with respect to place values. To count and regroup objects into tens and ones To use the concept of place value to compare numbers <p>Ordinal and Cardinal numbers</p> <ul style="list-style-type: none"> To indicate and identify the position of an object in a line To learn ordinal and 	<ul style="list-style-type: none"> - Without regrouping. - With regrouping. To use the place space value in standard algorithm of addition and subtraction. Able to solve addition and subtraction of simple problems in different daily life situations presented through pictures and stories. To frame problems for addition and subtraction facts. To estimate the sum of, and difference between, of two given numbers <p>Multiplication</p> <ul style="list-style-type: none"> Multiplies a given number by another number in various ways such as: -by drawing dots -by re-grouping -by repeated addition -by using multiplication facts Explains the meaning of multiplication Identifies the sign of multiplication. Able to construct the multiplication tables of 2, 3, 4, 5 and 10 To use an appropriate number operation in the life situation of the child / in the child’s context To multiply two digit numbers using standard algorithm and Lattice 	<p>(column) algorithm</p> <ul style="list-style-type: none"> Able to reason out the results of operations down on specified numbers Able to write tables up to 10×10. <p>Division: up to 4 digit number by single digit number.</p> <ul style="list-style-type: none"> To divide a given number by another number in various ways. To apply the four operations to life situations. To frame word problems. To estimate sums, differences and products of simple two digit numbers to nearest tens or hundreds. <p>Mental Arithmetic</p> <ul style="list-style-type: none"> Able to add and subtract multiple of 10 and 100, mentally. Complete multiplication facts by adding partial products, mentally (e.g, $7 \times 6 = 5 \times 6 + 2 \times 6$) 	<p>Introduction to square numbers</p> <ul style="list-style-type: none"> to understand the term square numbers to find out square numbers up to 100 <p>Factors and multiples.</p> <ul style="list-style-type: none"> Understand the meaning of factors and multiples To identify least common multiple(LCM) <p>Mental Arithmetic</p> <ul style="list-style-type: none"> Able to estimate sums, differences, products and quotients up to two digits numbers and verifies using approximation. <p>Systematic ordering:</p> <ul style="list-style-type: none"> Logically find out something based on the condition.(Eg: the child should be able to investigate and find the number of possible routes from one location to another on a map/maze; find out different words that can be made using five given letters; meaningful)
--	--	---	---	--	--

	<p>total number of objects</p> <p>Numbers from 11 to 20</p> <ul style="list-style-type: none"> • To form number sequence from 11 to 20 • To count object using these numbers • To group objects into a group of 10s and single objects • To develop the vocabulary of group of tens and ones. • To show the group of tens and ones by drawing • To count the number of tens and ones in a given number. • To write the numerals for eleven to twenty. <p>Addition (of single digit numbers whose sum is less than 10) and Subtraction of numbers without conversion</p> <ul style="list-style-type: none"> • To write numerals for ten and twenty • To Compare numbers up to 20 • To get introduced to vocabulary like total, together, altogether etc., to denote addition. • To introduce subtraction as “taking away” using real objects. • To understand subtraction as cancelling using pictures. • To use vocabulary like 	<p>cardinal numbers.</p> <p>Writing numbers up to 99</p> <ul style="list-style-type: none"> • to read and write numbers upto 99 (eg. if number is said, the child should be able to write the number, not necessarily in words. i.e., if teacher said 69, the child be able to write 69 but not necessarily “sixty – nine” <p>Reading and writing numbers upto 99 in words</p> <ul style="list-style-type: none"> • To read and write numbers in words eg: for 69 the child should be able to write sixty nine <p>Addition & Subtractions up to 99</p> <ul style="list-style-type: none"> • To learn addition and subtraction • To add and subtract two digit numbers beginning from concrete representations to abstract • To add and subtract numbers by drawing representations of tens and ones without and with regrouping. • To add zero to a number and subtract zero from a number. • To understand properties of addition through patterns. 	<p>multiplication algorithm</p> <p>Division</p> <ul style="list-style-type: none"> • Able to explain the meaning of division from the context of equal grouping and sharing. • To understand division as repeated subtraction • Able to relate division with multiplication. • Completes division facts: <ul style="list-style-type: none"> -by grouping -by using multiplication tables. <p>Mental Arithmetic</p> <ul style="list-style-type: none"> • Able to add and subtract single digit numbers and two digit numbers mentally. • Able to double two digit numbers mentally (result not exceeding two digits). 		
--	--	--	---	--	--

	<p>difference, take away, less etc., to denote subtraction.</p> <ul style="list-style-type: none"> To add and subtract using real objects and pictures. To add and subtract the numbers using symbols '+' and '-'. <p>Addition and Subtraction (upto 20)</p> <ul style="list-style-type: none"> To add and subtract numbers up to 20. <ul style="list-style-type: none"> -using concrete, tangible objects -using pictures -using numbers To observe and understand the different orientation in addition and subtraction To reason out the sum values <p>Familiarizing numbers up to 20</p> <ul style="list-style-type: none"> To group objects into ones, twos, fives and tens (for numbers till 20). To identify the predecessor and successor up to 20. To identify numbers "in between" <p>Numbers from 21 to 49/99</p> <ul style="list-style-type: none"> To learn numbers from 21 to 99. Write numerals for Twenty-one to Ninety nine. To group objects into 'tens' and 'ones' To draw representation for groups of tens and ones To represent numbers tens 	<ul style="list-style-type: none"> To be able to write stories to describe situations that corresponds to the given addition and subtraction facts. To estimate and check the reasonableness of answers to addition and subtraction problems through discussion. <p>Introduction to Multiplication and division</p> <ul style="list-style-type: none"> To do discussion of situations involving repeated addition and situations involving equal sharing To learn activities of making equal groups (activity only) <p>Mental Arithmetic</p> <ul style="list-style-type: none"> To add and subtract single digit numbers mentally. To add and subtract multiples of ten mentally 			
--	--	--	--	--	--

	<p>and ones through pictures.</p> <ul style="list-style-type: none"> To group a number orally into tens and ones To identify the predecessor and successor up to 99. To identify numbers” in between” Eg: 24, __, 26. To skip count by twos forward to backward up to Ninety-nine. To skip count by threes forward to backward up to Ninety-nine <p>[Ensure that this part(Numbers from 21 to 49/99 is an optional, so as to consider the pace of the learner]</p> <p>Mental Arithmetic</p> <ul style="list-style-type: none"> To add two single digits numbers up to sum of 10 mentally 				
PATTERNS	<p>Patterns in Sounds</p> <ul style="list-style-type: none"> To identify the patterns in sounds To make pattern through sounds <p>Patterns in Colours</p> <ul style="list-style-type: none"> To identify the patterns in colours. To make pattern through colours. <p>Patterns in Shapes</p> <ul style="list-style-type: none"> To identify the patterns in 	<p>Patterns in Sounds</p> <ul style="list-style-type: none"> To observe and extend patterns in sequence of sounds. Eg: Patterns of sounds can be extended by tapping benches, feet, clapping etc. To create patterns by mixing sound and body movements <p>Patterns in Colours</p> <ul style="list-style-type: none"> To observe and extend patterns in sequence of 	<p>Patterns in shapes</p> <ul style="list-style-type: none"> Creates patterns of regular irregular shapes by stamping (eg: by drawing leaves, ink blot diagrams) Searches for patterns in different ways of combining colours sounds, 2D and 3D shapes To recognize simple symmetries in shapes and patterns. To create patterns and designs from straight lines and other geometrical 	<p>Patterns in shapes</p> <ul style="list-style-type: none"> Observes shapes sequence from kaleidoscope Identifies the patterns in a sequence of shapes Creates Patterns using shapes sequence <p>Patterns in numbers</p> <ul style="list-style-type: none"> Able to identify patterns in multiplication and division: multiples of 9. To cast out nines from a given number to check if it is a multiple of nine. Able to identify patterns in 	<p>Patterns in shapes</p> <ul style="list-style-type: none"> To create patterns using different colours and shapes <p>Patterns in numbers</p> <ul style="list-style-type: none"> To identify patterns in square numbers and triangular numbers To relate sequences of odd numbers between consecutive square numbers <p>Patterns in Geometry</p> <ul style="list-style-type: none"> Able to make border strip and tiling

	<p>shapes</p> <ul style="list-style-type: none"> To make pattern through shapes. <p>Patterns in Numbers</p> <ul style="list-style-type: none"> To identify the patterns in numbers. (using elementary examples- single digit numbers) <p>Patterns in body movements</p> <ul style="list-style-type: none"> To identify the patterns in body movements <p>Iterative patterns and processes</p> <ul style="list-style-type: none"> To observe and collect similar objects from surroundings such as flowers, leaves; To draw similar objects and to compare them 	<p>colors. Eg: Patterns of colors can be extended by mixing different colours.</p> <p>Patterns in shapes</p> <ul style="list-style-type: none"> To create block patterns by stamping thumbprints, leaf prints, vegetable prints, etc. To create patterns of shapes of <ol style="list-style-type: none"> Regular(eg: in grid) Irregular and Combinations of a and b <p>Patterns in numbers</p> <ul style="list-style-type: none"> To observe patterns in different ways of splitting numbers or combining numbers. <p>Iterative patterns and processes</p> <ul style="list-style-type: none"> Able to draw simple rangoli(eg:3 by 3 pulliKolams) 	<p>shapes.</p> <p>Patterns in numbers</p> <ul style="list-style-type: none"> Able to identify patterns in the numerals for odd and even numbers and in adding odd and even numbers. To identify patterns in multiplication with, and dividing by 10s. <p>Iterative patterns and processes</p> <ul style="list-style-type: none"> Able to draw complex rangoli with condition.(eg:drawing more pullikolams, atleast one kolam which is a single curve.) To explore number patterns obtained by adding different numbers. To understand through patterns that multiplication is repeated addition, division as repeated subtraction. 	<p>multiplication and division by 10s, 100s.</p> <p>Patterns in Geometry</p> <ul style="list-style-type: none"> Able to identify symmetry in geometrical patterns 	<p>patterns.</p> <ul style="list-style-type: none"> To make patterns of shapes using different number of angles/ types of angles. To get introduced to rotation of angles. To find patterns by rotating angles To make patterns using rotational angles <p>Iterative patterns</p> <ul style="list-style-type: none"> Able to find patterns in a collection of words
MEAS UREMEN TS	<p>Introduction to Length</p> <ul style="list-style-type: none"> Comparison of Objects Using Length through Non Standard Units. To distinguish between near , far,thin,thick,longer/taller,s horter,high, low,lighter, heavier, bulk 	<p>Introduction to measuring (Length) through Standard units</p> <ul style="list-style-type: none"> To estimate and measure lengths/distances using uniform non-standard units like a pen cap/pencil, eraser, feet etc To appreciate the need for standard tool for measuring length, by 	<p>Length (using standard units - cm., m.,)</p> <ul style="list-style-type: none"> Able to appreciate the need for a standard unit. To measure length of objects in their environment using simple aids. To express appropriate standard units of length by choosing between centimeters and meters. 	<p>Length (m., cm., addition, subtraction, conversion and estimation of distance)</p> <ul style="list-style-type: none"> To understand relationship between meter and centimeter; Able to Convertmeter into centimeters and vice versa. To solve problems involving length and distances. Able to estimate length of an 	<p>Operations on Measured distance mass and capacity</p> <ul style="list-style-type: none"> Able to apply the four operations in solving problems involving length, weight and volume. Able to relate commonly used larger and smaller units of length, weight and

	<ul style="list-style-type: none"> To seriate objects by comparing their length and mass. To measure short lengths in terms of non- uniform units(in the context of ‘games eg., ‘Kittipil’ ‘golibundu’, ‘naadupudiatam’ or by leaping, jumping, etc.,) To estimate distance,measureslength and verifies using non uniform units (e.g. hand span, cubit, etc.,) 	<p>finding differences in non-standard tools.</p> <ul style="list-style-type: none"> To Use a ruler to measure lengths of different objects <p>Introduction to standard tool for measuring (weight)</p> <ul style="list-style-type: none"> Compare and identifies relationships between two or more objects by their weight. Appreciates the need for a simple balance Compares weights of given objects using simple balance <p>Introduction to volume (capacity)</p> <ul style="list-style-type: none"> compares and orders containers as per their capacities on the basis of perception & verifies by pouring out,etc., 	<ul style="list-style-type: none"> To understand order of magnitude between cm. , m., and km. as units. To estimate the length of given object in standard units and verifies by measuring. To use a ruler to measure length of items used in daily life. Able to relate centimeter and meter Appreciate the need for standard tool for measuring length, by finding differences in non-standard tools <p>Weight (using non-standard)</p> <ul style="list-style-type: none"> Able to weigh objects using non-standard Units. To understand the concept of conservation of weight(in gm and kg) that applies in a simple balance <p>Volume (capacity)-(using non-standard)</p> <ul style="list-style-type: none"> Able to measure and compare the capacity of different containers in terms of non-standard units. Appreciate the need for standard tool for measuring volume, by finding differences in non-standard tools 	<p>objects in their surrounding up to 1 meter and distance between two given locations in their environment up to 100 meters</p> <p>Weight (Using standard units Kg., gm., addition subtraction)</p> <ul style="list-style-type: none"> Weighs objects using a balance and standard units Estimates the weight of an object and verifies using a balance <p>Volume (Using standard units L., ml., addition subtraction)</p> <ul style="list-style-type: none"> Able to measure volume of given liquid using containers marked with standard units Able to estimate the volume of a liquid contained in a vessel and verifies by measuring 	<p>Volume and converts one to the other.</p> <ul style="list-style-type: none"> To appreciate the volume of a solid body: qualitatively and also by informal measurement.
MONEY	<p>Notes and coins</p> <ul style="list-style-type: none"> To identify common currency notes and coins To put together small amounts of money 	<p>Notes and coins</p> <ul style="list-style-type: none"> To add and subtract small amounts of money mentally. To identify currency – 	<p>Relating rupee and paise</p> <ul style="list-style-type: none"> To understand the relationship between rupee and paise To add and subtract amounts 	<p>Estimating cost</p> <ul style="list-style-type: none"> Able to convert rupees to paise. To add and subtract simple amounts of money in 	<p>Operations on money</p> <ul style="list-style-type: none"> To apply four operations in solving problems involving money.

		<p>notes and coins</p> <ul style="list-style-type: none"> • Puts together amounts of money not exceeding Rs. 100/- • To transact an amount using three to four notes. • To compare the rate of same product but different prices. • To use the vocabulary as more amount, less amount, expensive, inexpensive 	<p>involving rupees and paise amounts of multiples of 10 without re-grouping.</p> <p>Making bills</p> <ul style="list-style-type: none"> • to collect bills for goods/items bought • To make rate charts and simple bills 	<p>denominations of rupees and paise which are multiples of ten using column addition and subtraction with regrouping.</p> <ul style="list-style-type: none"> • To learn to use operations to find totals, change, multiple costs and unit cost. • Able to estimate roughly the total cost. 	<p>Comparing cost</p> <ul style="list-style-type: none"> • to collect bills of items bought and compare costs of same items • to find and reasons out for being expensive and inexpensive • to use the vocabulary such as expensive, costly, cheap, affordable, luxurious, inexpensive [Textbook writer has to note the usage of these words, such as when, where and why with examples of using these words in real life situations].
TIME	<p>Comparison of events based on time</p> <ul style="list-style-type: none"> • To Distinguish between events occurring in time using term- earlier and later, old, new, less time, more time, shorter period or longer period, fast, slow, morning, evening, day and night • To observe changes in the position of sun throughout the day with time intervals <p>Organizes events based on time</p> <ul style="list-style-type: none"> • Narrates the sequence of 	<p>Days, seasons & months</p> <ul style="list-style-type: none"> • Able to draw time- Cyclic events(such as day – night; days of the week; events of the day starting from brushing the teeth to sleep) • To get familiar with the days of the week and months of the year. • To get a feel for sequence of seasons. • To be able to sequence the events occurring over longer periods in terms of dates/days. 	<p>Reading date and time (calendar, hours, minutes, am, pm)</p> <ul style="list-style-type: none"> • to read a particular day and date • to understand the manufacture and expiry date of different products • To read the time correct to the hour (both digital and analogue). • Tells morning, noon, afternoon, evening, night and midnight. • To sequence the events chronologically. <p>Iterative patterns and</p>	<p>Time manipulation</p> <ul style="list-style-type: none"> • Understands days by week • to use knowledge of days of a week finds the day in previous or upcoming week • Computes the number of weeks in a year • Able to correlate the number of days in a year with the number of days in each month. • To read clock time to the nearest hours and minutes. • Able to express time, using the terms, ‘a.m.’ and ‘p.m.’ <p>[Ensure that the children learn the meaning of prime</p>	<p>Time manipulation</p> <ul style="list-style-type: none"> • To use addition and subtraction in finding time intervals in simple cases

	events in a day	<p>Calculating time</p> <ul style="list-style-type: none"> By using different containers to measure volume observes and calculates time, by using the terms like quick/fast and slow. To apply the knowledge learnt in money and understands that different modes of transports can be used based on time and money 	<p>processes–Time based</p> <ul style="list-style-type: none"> To draw time-Cyclic events of a year(Months, seasons, festivals) 	<p>meridian and ante-meridian from geography/earth science]</p> <ul style="list-style-type: none"> Relates to 24 hour clock with respect to 12 hour clock Able to estimate the duration of familiar events. Able to compute the number of days between two given dates. Use Calendar (interlinking with patterns) 	
INTERCONCEPTS	-	-	-	-	<p>Integrating distance, money and time</p> <ul style="list-style-type: none"> Able to reason out in solving problems by comparing time, money and distance Able to create problems integrating time, money and distance To use fractions in the context of units of length,time and money.
FRACTIONS	-	-	-	<p>Introduction to natural fractions</p> <ul style="list-style-type: none"> Able to observe items being a part or parts of a whole Able to find the fractional part of a collection. To identify the notation of 	<p>Compare fractions</p> <ul style="list-style-type: none"> Finds a number corresponding to part of a collection in the form of fractions To Compare different

				<p>fractions</p> <ul style="list-style-type: none"> • Use the vocabulary as half, quarter, three-fourths, semi, partial and whole • Able to Define Fractions • To compare natural fractions and identifies greater and smaller <p>Symbolic representation of simple fractions</p> <ul style="list-style-type: none"> • Relating parts to whole eg: Filling up water in a measured bottle partially / fixing up puzzles circularly/ vertically/ horizontally in places and completes the whole. • Identifies half, one fourth and three- fourths of a whole. • Identifies the symbols, $\frac{1}{4}$, $\frac{1}{2}$, $\frac{3}{4}$ • Explains the meaning of $\frac{1}{4}$, $\frac{1}{2}$, $\frac{3}{4}$ • to appreciate equivalence of $\frac{2}{4}$ and $\frac{1}{2}$ and of $\frac{2}{2}$, $\frac{3}{3}$, $\frac{4}{4}$ and 1 	<p>simple fraction ($\frac{1}{2}$, $\frac{1}{4}$, $\frac{3}{4}$ etc)</p> <ul style="list-style-type: none"> • To identify the terms like numerator and denominator. • To know types of fractions : Proper , Improper, mixed , like, unlike, equivalent <p>Equivalent fractions</p> <ul style="list-style-type: none"> • Able to compare like fractions with denominators up to 20. • Able to estimate the degree of closeness of a fraction to known fractions ($\frac{1}{2}$, $\frac{1}{4}$, $\frac{3}{4}$ etc) <p>Operations of fractions</p> <ul style="list-style-type: none"> • Able to do addition and subtraction of like fraction • Able to do multiplication of fractions by single digit numbers <p>Relationship between Fractions and Decimals</p> <ul style="list-style-type: none"> • To introduce the concept of decimal • Able to express a given fraction in decimal notation and vice versa

UPPER PRIMARY DRAFT SYLLABUS

TOPIC	CLASS VI	CLASS VII	CLASS VIII
NUMBER SYSTEM – I	<p>Numbers and operations.</p> <ul style="list-style-type: none"> • Understand the concepts of numbers (up to 8 digits), number names and numerals • Understands Indian and international representation of large numbers • Understands estimation as an important tool for large numbers (5 digits and beyond) • Identify smaller/larger numbers, compare using $<$, $>$, $=$ symbols, arrange in ascending/ descending order. • Perform the four fundamental operations (answers not to exceed six digits) and applies the right operation in word problems. • Perform operations in the right order using BODMAS rule <p>Whole numbers</p> <ul style="list-style-type: none"> • Understand extension of natural numbers to whole numbers • To represent whole numbers on number line. • Understand the four properties of numbers with emphasizing terminology (closure, commutative, associative, distributive properties over addition and multiplication identity of a numbers). • Identify and appreciate number patterns-ex: triangular numbers and 	<p>Arithmetic of Integers</p> <ul style="list-style-type: none"> • Understand addition and subtraction of integers using number line. • Able to add and subtract integers using real life situation. • Able to multiply and divide integers by whole numbers. • Understand that division by zero is meaningless. • Able to multiply and divide integers by integers. • Solve word problems using the four fundamental operations on integers and applies appropriate operations in word problems. <p>Properties of Integers</p> <ul style="list-style-type: none"> • Understand closure, commutative, associative, distributive properties (multiplication over addition), additive and multiplicative identities, applied to integers. • Understand which properties hold for which operations, and illustrate difference from whole numbers (example: closure property for subtraction) <p>Decimal Numbers</p> <ul style="list-style-type: none"> • Recall the notion of decimal point. • Understand place value in decimals. • Learn the concept of decimals as fractions with denominators of tens and its multiples. • Represent decimal Numbers on Number line. 	<p>Rational Numbers</p> <p>Rational Numbers</p> <ul style="list-style-type: none"> • Understand the necessity for extending fractions to rational numbers. • To represent rational number on number line. • Understand that between any two rational numbers there lies another rational number <p>Arithmetic of Rational Numbers</p> <ul style="list-style-type: none"> • To learn to perform all four operations on rational numbers. • Able to solve word problems on all operations. . <p>Properties of Rational numbers</p> <ul style="list-style-type: none"> • Understand the four properties of rational numbers, additive identity and multiplicative identity. <p>Simplify Expression with three brackets</p> <ul style="list-style-type: none"> • Able to simplify expressions with utmost three brackets. <p>Powers</p> <ul style="list-style-type: none"> • To express numbers in exponential form with integers as exponents. • Understand the laws of exponents with integral powers. • Able to calculate square and square roots of integers. - Square roots using factor method and division method for numbers containing <ul style="list-style-type: none"> ○ not more than 4 digits ○ not more than 2 decimal places (in case of imperfect squares) • To recognize cubes and cube roots

	<p>square numbers.</p> <p>Test of divisibility</p> <ul style="list-style-type: none"> Recall the concepts of factors and multiples with the aid of multiplication tables up to 10. Understand the rules of divisibility test and apply it to numbers 2, 3, 4, 5 and 10. <p>Prime numbers</p> <ul style="list-style-type: none"> Recall the classification of even and odd numbers. Understand the concept of Prime and composite numbers <p>Factorization</p> <ul style="list-style-type: none"> To factorize 2-digit numbers. To learn prime factorization of a given number 	<p>Arithmetic of Decimals</p> <ul style="list-style-type: none"> Add and subtract decimal numbers. Able to apply the appropriate operation in word problems- addition and subtraction of decimals. Multiply and divide decimal numbers. Able to solve word problems based on decimal numbers (all operations). 	<p>(only factor method for numbers containing at most 3 digits).</p> <ul style="list-style-type: none"> To learn to estimate square roots and cube roots (Learning the process of moving nearer to the required number). Able to calculate in easy ways and estimate the answer using all four fundamental operations Able to approximate numbers up to three digits. <p>PATTERNS AND RELATIONS</p> <p>Playing with numbers</p> <ul style="list-style-type: none"> Understand patterns in Numbers Σn, Σn^2 etc. <p>Magic Squares</p>
<p>NUMBER SYSTEM-II</p>	<p>LCM & HCF</p> <ul style="list-style-type: none"> Understand the concepts of HCF and LCM Understand the concept of co-prime numbers. Calculate HCF and LCM by prime factorization method and division method. Deduce the relationship between LCM and HCF and the product of two numbers. Able to solve word problems with HCF and LCM 		

	<p>Introduction of Integers</p> <ul style="list-style-type: none"> • Understand the necessity for extension of whole numbers to negative integers. • Understand that the collection of positive integers, negative integers and zero forms integers. • Represent integers on the number line. • Compare integers and arrange them in ascending / descending order. <p>Arithmetic of Fractions</p> <ul style="list-style-type: none"> • Revise notion of fractions and fraction addition/subtraction • Understand mixed and improper fractions and convert from one to the other • Able to multiply and divide fractions by other fractions • To find the reciprocal of a fraction. • Able to solve word problems that involve fractions (with all four operations). 		
<p>II. Measurements</p>	<p>Metric Measures</p> <ul style="list-style-type: none"> • Recall the conversion of units of length, weight and volume restricting to the units mentioned below. (km, m, cm, mm and similarly units that are in common use in weight and volume). • Able to understand the use of decimal point to convert smaller to larger units • Able to add and subtract quantities with different unit with appropriate conversion 	<p>Area and Perimeter</p> <ul style="list-style-type: none"> • To revise the concepts of Perimeter and Area of Square, Rectangle, Right triangle and combined shapes. • To determine the area of Parallelogram, Rhombus, and Trapezium and regular hexagon <p>Circle</p> <ul style="list-style-type: none"> • To determine the area and circumference of Circles and its parts. <p>Area of Pathway</p> <ul style="list-style-type: none"> • To calculate the area of Pathway inside and outside the given rectangles and circles applying the concept of area of rectangle and circle respectively. 	<p>Circle</p> <ul style="list-style-type: none"> • To introduce the concept of segment and chord. • To find the length of arc, area of sector. <p>Area and Perimeter of combined Plane Figures.</p> <ul style="list-style-type: none"> • Recall the concepts of area & perimeter for various quadrilaterals • Calculate the area of simple combined figures (Not more than three figures placed in juxtaposition) <p>3-Dimensional Shapes</p> <ul style="list-style-type: none"> • Understand representation of 3-dimensional shapes in 2D • Understand representation of 3D objects with Cubes.

	<p>Measures of Time</p> <ul style="list-style-type: none"> • Able to read time on a clock (Eg.1:15 min. as quarter past one) • Use both 12-hour and 24-hour formats to read time and convert from one to another. • Able to find the duration between 2 time instances. • Able to convert from one unit of time to the other – seconds to minutes and hours and vice – versa, days to weeks, years, leap year and vice – versa. <p>Area and Perimeter</p> <ul style="list-style-type: none"> • Understand the concept of area and perimeter of plane figures. • To learn to find the area and perimeter of square, rectangle, right triangle and combined shapes. <p>Conversion of Square units</p> <ul style="list-style-type: none"> • To Convert Square units (Eg. cm^2 to m^2) 		
<p>III. ALGEBRA</p>	<p>Introduction to Algebra</p> <ul style="list-style-type: none"> • Introduction to variable through patterns and through appropriate word problems and generalizations. • To generate such patterns with more examples. • To solve unknowns through examples with simple contexts (single operations). 	<p>Algebraic Expressions</p> <ul style="list-style-type: none"> • Identify constants and variables in a given term of an algebraic expression and coefficients of the terms. • Identify like and unlike terms. • To learn to write the degree of expressions like x^2y etc. • Able to add and subtract algebraic expressions, with integer coefficients • Able to form simple expressions with two 	<p>Revision</p> <ul style="list-style-type: none"> • To recall addition and subtraction of expressions. <p>Algebraic Expressions</p> <ul style="list-style-type: none"> • Able to multiply algebraic expressions with integer coefficients • Able to divide algebraic expressions by monomial • Able to understand and avoid some common errors (e.g. $2xx = x$, $7xxy = 7xy$) <p>Identities</p>

		<p>variables.</p> <p>Solving simple linear equations</p> <ul style="list-style-type: none"> To solve simple linear equations (in contextual problems) (avoid complicated coefficients). <p>Graphical representation of inequalities in a single variable.</p> <ul style="list-style-type: none"> To represent inequalities of a single variable graphically. <p>Exponents</p> <ul style="list-style-type: none"> Understand the laws of Exponents(through observing patterns and arrives at generalization.) $a^m a^n = a^{m+n}$ where $m, n \in \mathbb{N}$ $(a^m)^n = a^{mn}$ where $m, n \in \mathbb{N}$ $\frac{a^m}{a^n} = a^{m-n}$ where $m, n \in \mathbb{N}, m > n$. To find units digits of large numbers represented by exponents (ex: 23^{50}) by observing patterns <p>Algebraic identities</p> <ul style="list-style-type: none"> To deduce identities with geometrical proofs, numerical examples and apply it in sums <p>$(a + b)^2 = a^2 + 2ab + b^2, (a - b)^2 = a^2 - 2ab + b^2$</p> <p>$a^2 - b^2 = (a + b)(a - b)$.</p> <p>Able to recognize (simple cases only) expressions that are factorizable of the following types</p> <p>$a(x + y), (x \pm y)^2, a^2 - b^2$</p>	<ul style="list-style-type: none"> To recall the identities for $(a + b)^2, (a - b)^2, a^2 - b^2$ Able to apply identities in problems Deduce identities with geometrical proofs, numerical examples and applies it in sums <p>Factorizations</p> <ul style="list-style-type: none"> Able to recognize (simple cases only) expressions that are factorizable of the following types $(a+b)^3, (a-b)^3, (x+a)(x+b)(x+c)$ <p>Solving linear equations</p> <ul style="list-style-type: none"> Able to solve word problems that involve linear equations (with simple coefficients) <p>Graphs:</p> <ul style="list-style-type: none"> Able to plot graphs of simple linear functions (ex: $y=5x$)
IV. MODELLING	<p>Ratio and Proportion</p> <ul style="list-style-type: none"> Understand the concept of Ratio Understand that Proportion is same as 	<p>Recall: Ratio and Proportion</p> <ul style="list-style-type: none"> To recall the concept of ratio and proportion. 	<p>Revision</p> <ul style="list-style-type: none"> Profit, Loss and simple interest. <p>Application of percentage, profit & loss,</p>

	<p>the ratio of two.</p> <ul style="list-style-type: none"> • Able to calculate the needed quantity using unitary method (with only direct variation implied). <p>Shopping</p> <ul style="list-style-type: none"> • Able to prepare a bill. • To verify the bill amount. <p>Profit and loss</p> <ul style="list-style-type: none"> • Able to calculate cost price, Selling Price and Profit/Loss. 	<p>Indirect and Direct variation</p> <ul style="list-style-type: none"> • Understand the concept of indirect variation • Able to differentiate direct and indirect variation and calculate the needed quantity using direct and indirect variation. <p>Fraction and decimal into percentage</p> <ul style="list-style-type: none"> • Understand percentage as a fraction with denominator 100. • Able to convert fractions and decimals into percentages and vice-versa • To solve word problems based on percentage. <p>Simple Interest Able to calculate simple interest.</p>	<p>overhead expenses, Discount, tax.</p> <ul style="list-style-type: none"> • To solveslightly advanced problems involving applications of Percentages, Profit & Loss, overhead expenses, Discount, tax. <p>Compound Interest</p> <ul style="list-style-type: none"> • Able to find compound interest through patterns and use it in simple problems. (Compounded yearly up to 3 years or half-yearly up to 3 steps only). • Able to differentiate between simple and compound interest <p>(The numbers used for calculation purpose should be easy - otherwise, calculator can be used.)</p> <p>Compound variation</p> <ul style="list-style-type: none"> • To do problems on compound variation • To solve Time and Work problems– Simple and direct word problems.
<p>V.GEOMETRY</p>	<p>Introduction to point , line, ray , segment and planes</p> <ul style="list-style-type: none"> • Understand fundamental geometrical terms -points, lines, rays, segments and planes. • Understand collinear points and concurrent lines, point of concurrency • Understand parallel and perpendicular lines. <p>Angles and their types</p> <ul style="list-style-type: none"> • Understand the concept of angles. • Identify vertex, arms and measure angles. • Understand right, acute, obtuse and straight angles. • Understand complementary & supplementary angles and find complementary and supplementary angles for the given angles. <p>Types of Triangles</p>	<p>Properties of Parallel lines</p> <ul style="list-style-type: none"> • Understand the properties of angles in intersecting lines, adjacent angles, adjacent angles on a straight line, parallel lines and transversal lines. <p>Properties of Triangles</p> <ul style="list-style-type: none"> • Able to apply angle sum property of a triangle. <p>Congruence triangles properties</p> <ul style="list-style-type: none"> • To know the concept of congruency and similarity of triangles. • To know the criteria for similarity of triangles. (SSS, SAS, ASA, RHS). <p>PATTERNS AND RELATIONS- Symmetry through transformation</p> <ul style="list-style-type: none"> • To recall the types of Symmetry through diagram • To learn Symmetry through transformations (Translation, reflection, rotation and their combination) 	<p>Properties of Triangles</p> <ul style="list-style-type: none"> • To recall the properties of triangles. • Understand theorems based on properties of triangles and apply them to appropriate problems. • Understand Pythagoras theorem and solve problems using it. <p>Concurrent Points of a triangle with definition</p> <ul style="list-style-type: none"> • Understand the concurrency of medians, altitudes, angle bisectors and perpendicular bisectors in a triangle. <p>PATTERNS AND RELATIONS Playing with numbers</p> <ul style="list-style-type: none"> • Logical reasoning diagrams <p>PRACTICAL GEOMETRY- Circles</p> <ul style="list-style-type: none"> • Able to draw the parts of a circle and identify and compare the relationship between

	<ul style="list-style-type: none"> • Able to recognize different kinds of triangles based on (a) length of sides (b) measures of angles. <p>Symmetry</p> <ul style="list-style-type: none"> • Able to find symmetrical objects in Surrounding. • To learn types of symmetry <p>PRACTICAL GEOMETRY</p> <ul style="list-style-type: none"> • To identify Geometrical instruments. • Able to measure and draw line segment. • Able to construct parallel and perpendicular lines using set square. • Able to draw given angles using protractor 	<p>PRACTICAL GEOMETRY-</p> <p>Construction using scale and compass.</p> <ul style="list-style-type: none"> • To construct the perpendicular bisector of the given line segment. • To construct the angle bisector of the given angle. • To construct special angles without protractor - 90°, 60°, 30°, 120°. • Construction of triangles: given SSS, SAS, ASA. • To construct circles and concentric circles. 	<p>radius and diameter.</p> <p>Construction of Quadrilaterals: trapezium, parallelogram, rhombus, rectangle and square</p> <ul style="list-style-type: none"> • Able to construct quadrilaterals: trapezium, parallelogram, rhombus, rectangle and square.
<p>VI. STATISTICS</p>	<p>Introduction</p> <ul style="list-style-type: none"> • Understand the necessity to collect data. • Organize collected discrete data using tally marks and a table. <p>Pictograph</p> <ul style="list-style-type: none"> • Able to interpret a pictograph and understand the need for scaling. <p>Bar graph</p> <ul style="list-style-type: none"> • Able to interpret data from bar graphs. • Able to construct bar graphs from the given data. 	<p>Collection and organization of continuous data</p> <ul style="list-style-type: none"> • To collect and organize continuous data. • Able to form a frequency table. <p>Mean, Median, Mode</p> <ul style="list-style-type: none"> • To calculate Mean, Median, Mode of ungrouped data and understand what they represent 	<p>Formation of frequency table</p> <ul style="list-style-type: none"> • To recall formation of frequency table. <p>Representation</p> <ul style="list-style-type: none"> • To draw Histogram, frequency polygon for grouped data • To construct simple Pie- charts for the given data. <p>Measures of central tendency</p> <ul style="list-style-type: none"> • Able to calculate mean, median and mode for discrete data.

<p style="text-align: center;">VIII. INFORMATION PROCESSING</p>	<p>Systematic Listing, Counting, Reasoning</p> <ul style="list-style-type: none"> • Sudoku; solving sudoku. • Triangles with numbers on them adding to given sum; • Explore how many; how do you know you have counted all. <p>Modelling</p> <ul style="list-style-type: none"> • Tree diagrams for numerical expressions; what regrouping does to the shape of the tree. • Representing carrom board and "strikes". <p>Iterative patterns and processes</p> <ul style="list-style-type: none"> • Euclid's algorithm, Euclid's game: (Ref: https://en.wikipedia.org/wiki/Euclidean_algorithm) <p>Following and Devising Algorithms</p> <ul style="list-style-type: none"> • Sorting given information on different attributes. • Disordering given ordered information. 	<p>Systematic Listing, Counting, Reasoning</p> <ul style="list-style-type: none"> • Tetraminoes: make all the shapes. How many up to rotations and flips. <p>Modelling</p> <ul style="list-style-type: none"> • Simple road map of town; roads carry costs; cost of routes; minimal cost paths. • Games like Sprouts and puzzles like 3-cup problem (Ref: Wikipedia) <p>Iterative patterns and processes</p> <ul style="list-style-type: none"> • Given table, find the function. • Pascal's triangle and Fibonacci sequences. <p>Following and Devising Algorithms</p> <ul style="list-style-type: none"> • Making "best" schedules, time-tables, deciding order of tasks under given set of constraints. • Creating and using flowcharts. 	<p>Systematic Listing, Counting, Reasoning</p> <ul style="list-style-type: none"> • Determine the number of possible orderings of an arbitrary number of objects, describe procedures for listing and counting all such orderings. <p>Modelling</p> <ul style="list-style-type: none"> • Games like SETS: https://en.wikipedia.org/wiki/Set_game • Map colouring using examples. • Making time tables. • Modelling 100 metre dash, long jump, high jump, javelin throw. <p>Iterative patterns and processes</p> <ul style="list-style-type: none"> • Given description of simple physical/biological system, predict future behaviour. • Model of solar and lunar eclipse (imprecise but correct). • Devising and breaking simple codes. <p>Following and Devising Algorithms</p> <ul style="list-style-type: none"> • Use of queues (e.g. at water taps, bus stops) • Best ways of packing objects into a bag / box. • Shopping to a budget, with constraints on money, weight, volume.

SECONDARY DRAFT SYLLABUS

CLASS IX	CLASS X
<p>Topic :Set Language</p> <p>1. Describing and representing sets</p> <p>Able to describe a set in Descriptive, Set- builder and roster forms and through Venn diagram. Use symbols like \in, \notin, \emptyset, etc.</p> <p>2. Types of sets</p> <p>Able to identify different kinds of sets. (Empty set, Finite set, Infinite set, Equal set, Subset, Power set, and Universal set, cardinality of sets)</p> <p>3. Set Operations.</p> <p>Describes and illustrates – union, intersection, difference, symmetric difference and complementation.</p> <p>Understands the commutative, associative and distributive properties of set operations-(restricted to three sets)</p> <p>4. Formula for set operations.</p> <p>Formula for $n(A \cup B)$ and $n(A \cup B \cup C)$; statement and verification of De Morgan law using Venn diagram.</p> <p>5. Application:</p> <p>Solving simple word problems.</p> <p>(Minimum number of problems illustrating the use of each concept in conformity with the number of periods allotted)</p>	<p>Topic : Relations and Functions</p> <p>1. Defining Relations and Functions</p> <p>Able to define and perform Cartesian product of two sets. To define a relation as a subset of product of two sets. To define function as a special relation and cite examples.</p> <p>2. Representation of functions.</p> <p>Identifying a function through an Arrow diagram, a Table, a Rule or a graph. (Simple examples) The domain and Range. Vertical Line test.</p> <p>3. Types of functions.</p> <p>Classifying functions as one-one, many-one, onto, into and bijection); (simple examples)</p> <p>4. Composition of functions (two and three)</p> <p>Applying the results of one function on another. Examples for Commutative and associative nature of combining functions.</p> <p>5. Identification of some special functions</p> <p>Identifying the graphs of Linear, Quadratic, Cubic and Reciprocal functions.</p>
<p>Topic : 2. Real Number System</p> <p>1. Revision: Natural numbers, Whole numbers, Integers and Rational numbers.</p> <p>To recall the representation of natural numbers, whole numbers, integers, and rational numbers on the number line.</p> <p>2. Rational numbers.</p>	<p>Topic : 2. Numbers and Sequences.</p> <p>1. Euclid’s division algorithm</p> <p>Able to write Euclid’s division lemma for a division sum To find LCM and HCF using Euclid’s division algorithm</p> <p>2. Fundamental theorem of arithmetic</p>

<p>Able to classify rational numbers as recurring / terminating decimals.</p> <p>To represent terminating / non terminating recurring decimals, on the number line through successive magnification.</p> <p>3. Irrational numbers</p> <p>To identify non terminating, non-recurring decimals leading to the existence and representation of irrational numbers such as $\sqrt{2}$, $\sqrt{3}$ and $\sqrt{5}$ on the number line.</p> <p>To do elementary basic operations on irrational numbers.</p> <p>Able to rationalize given irrational numbers of the type $1/(a + b\sqrt{x})$ and $1/(\sqrt{x} + \sqrt{y})$, where x, y are natural numbers and a, b are integers.</p> <p>4. Real numbers</p> <p>To identify a one–one correspondence between the real numbers and the points of a directed straight line. (The ratio of the examples for each concept to that of the exercise problems is 1:1)</p> <p>5. Scientific notation</p> <ul style="list-style-type: none"> To understand the meaning of Scientific Notation. To understand the importance and convenience of expressing numbers in scientific notation. Able to convert larger/smaller numbers to scientific notation and vice – versa. 	<p>Able to understand the fundamental theorem of arithmetic</p> <p>3. Modular arithmetic</p> <p>To understand congruence modulo ‘n’, addition modulo ‘n’, and multiplication modulo ‘n’</p> <p>4. Sequences</p> <p>To define sequence and to visualize a sequence as a function</p> <p>5. Progressions</p> <p>To define an Arithmetic Progression and a Geometric Progression. (A.P. and G.P)</p> <p>Able to find the n^{th} term of an A.P and its sum to n terms.</p> <p>Able to find the n^{th} term of a G.P. and its sum to n terms.</p> <p>6. Series</p> <p>To determine the sum of some finite series such as $\Sigma n, \Sigma n^2, \Sigma n^3$</p>
<p>Topic : 3. Algebra</p> <p>1. Polynomials</p> <p>To define a polynomial in one variable.</p> <p>Classification as monomial, binomial, etc.</p> <p>To Identify the terms, the coefficients and the exponents of a polynomial and its degree.</p> <p>Classification of polynomials as linear, quadratic, cubic etc.</p> <p>Evaluate a polynomial for given values of the variable.</p> <p>Identifies zeros of a polynomial.</p> <p>Learns to Add, subtract, and multiply polynomials.</p> <p>Understand that polynomials form a system analogous to the integers, namely, they are closed under the operations of addition, subtraction, and multiplication.</p> <p>2. Remainder theorem</p> <p>To understand the remainder theorem via examples and analogy to integers and use it to find the remainder.</p>	<p>Topic : 3. Algebra</p> <p>1. Simultaneous linear equations</p> <p>To recall solving a pair of linear equations in two unknowns.</p> <p>To solve a pair of linear equations in three variables by method of elimination only.</p> <p>2. Synthetic division</p> <p>To determine the remainder and the quotient of the given polynomial using Synthetic Division.</p> <p>To use Synthetic division in the process of factorising a polynomial.</p> <p>3. Rational expressions</p> <p>Able to simplify algebraic rational expressions (Simple Problems),</p> <p>4. Square root</p> <p>To understand and compute the square root of a</p>

<p>3. Identities</p> <p>To recall/understand the algebraic identities for $(a + b)^2$, $(a - b)^2$, $a^2 - b^2$, $(x + a)(x + b)$, $(a + b + c)^2$, $(a + b)^3$ and $(a - b)^3$. (to be supplemented by visual illustration wherever possible)</p> <p>Able to verify identities of the type, $(x + a)(x + b)(x + c)$ and $x^3 + y^3 + z^3 - 3xyz$ and use them in problem solving.</p> <p>4. Factor theorem</p> <p>To learn the statement and proof of the factor theorem and use it to find the factors of a given polynomial, in particular (i) trinomials of the type $ax^2 + bx + c$, $a \neq 0$ where a, b, c are real numbers and (ii) cubic polynomials.</p> <p>Learn to obtain the GCD and LCM of (at most three) algebraic expressions by factor method only.</p> <p>5. Linear equations in two variables</p> <p>to recall linear equations in one variable to identify and solve linear equations in two variables by (a) Substitution (ii) elimination, (iii) Cross multiplication and (iv) Graphical methods to explore the possibilities for (i) unique, (ii) infinite or (iii) no solutions. Apply linear equations in two variables to solve problems from life situation.</p> <p>6. Linear Graphs</p> <p>Able to draw straight lines, intersecting and non-intersecting straight lines. Solving linear equations using their graphs.</p>	<p>polynomial. Able to correlate relationship between discriminant and nature of roots.</p> <p>5. Quadratic Equations</p> <p>Able to form a quadratic equation in the standard form $ax^2 + bx + c = 0$, ($a \neq 0$), when the roots are given. To solve quadratic equations (only real root) – by (i) factorization, (ii) completing the square and (iii) using formula. Able to write and solve a quadratic equation, when given a word problem (related to day-to-day activities). To comprehend the relationship between zeros and coefficients of a quadratic expression.</p> <p>6. Quadratic graphs</p> <p>Able to solve quadratic equations through graphs. Able to determine the relationship between the nature of the solutions and the graph of a quadratic function.</p> <p>7. Graphs of variations</p> <p>To solve graphically equations $y \propto x$, $y \propto \frac{1}{x}$, $xy = k$, $\forall x, y > 0$.</p> <p>8. Matrices</p> <p>1. Types of matrices</p> <p>To introduce matrices through examples To identify the order and formation of matrices To recognize different types of matrices</p> <p>2. Matrix operations</p> <p>Able to add and subtract the given matrices. To multiply a matrix by a scalar, and to find the transpose of a matrix. To multiply 2×2; 2×3; 3×2 Matrices. To evaluate the determinant of a 2×2 matrix and find the inverse of the matrix.</p> <p>3. Matrix equation</p> <p>To solve the equations of two variables - using matrix method.</p>
<p>Topic : 4. Geometry</p> <p>1. Properties of parallelograms (Theorems without proof)</p> <p>To recall the theorems on linear pair, vertically opposite angles, angle - sum property of a triangle (interior and</p>	<p>Topic : 4. Geometry</p> <p>1. Proportionality theorems</p> <p>To discover geometrical facts given by</p> <p>i. *basic proportionality theorem* for a triangle and its *converse*</p>

<p>exterior) and congruent triangles.</p> <p>To classify quadrilaterals and parallelograms (through hands-on activities) and list their properties to use them in problem solving.</p> <p>2. Circle theorems</p> <p>To understand that there is only one circle that passes through 3 non-collinear points</p> <p>To learn about equal chords in a circle, the perpendicular from the centre to any chord, and congruent arcs.</p> <p>To discover the relationships between the angles at the centre of a circle, angles in Cyclic quadrilaterals, and angles at the circumference in the same segment. (All the above through practical work and not by theoretical proofs)</p> <p>Simple problems based on the above concepts.</p> <p>3. Practical Geometry</p> <p>Able to identify and understand through practical work, the centroid, orthocentre, circumcentre and incentre of a triangle.</p>	<p>ii. angle bisector theorem and its converse</p> <p>To apply them to solve numerical problems only.</p> <p>2. Similar triangles</p> <p>To discover properties of similar triangles by practical work. (theorems without proof)</p> <p>Pythagoras theorem*</p> <p>3. Circles and Tangents</p> <p>To understand the facts (without formal proof) on lengths of tangents to a circle, angle between tangent and radius through the point of contact and alternate segment theorem.</p> <p>4. Concurrency theorems</p> <p>States Ceva's theorem and Menelau's theorem (without proof).</p> <p>5. Practical Geometry</p> <p>To construct tangents to circles.</p> <p>To construct triangle, given its base, vertical angle at the opposite vertex and (a) median or (b) altitude or (c) bisector.</p> <p>Able to construct a cyclic quadrilateral.</p>
<p>Topic : 5. Coordinate Geometry</p> <p>1. Plotting Points on a plane</p> <p>To understand the concept of Cartesian plane with its axes.</p> <p>Able to plot the points on the plane and write the co-ordinates of a given point,</p> <p>2. Distance between two points</p> <p>Able to find the distance between two given points and make use of it in problems.</p> <p>3. Section formula</p> <p>To determine the point of division using section formula (internal division only)</p> <p>To find and use midpoint formula</p> <p>To find the centroid of a triangle by formula.</p> <p>4. Graph of a linear equation</p> <p>To examine linear equations of the type $ax+by+c=0$, writing it as $y = mx + c$ and linking with the chapter on linear in two variables.</p>	<p>Topic : 5. Coordinate Geometry</p> <p>1. Area of a triangle</p> <p>To recall formulae for distance between two points, and the midpoint of two given points and the point of internal division (using section formula) .</p> <p>To calculate the area of a triangle using formula.</p> <p>To find area of a quadrilateral given its vertices.</p> <p>To determine the slope of a line (i) when two of its points are given, (ii) its equation is given.</p> <p>2. Forms of Straight line</p> <p>Able to find the equation of a straight line in:</p> <ul style="list-style-type: none"> i. slope-intercept form, ii. point -slope form, iii. two -point form, iv. intercept form.
<p>Topic : 6. Trigonometry</p> <p>1. Trigonometric ratios</p> <p>To understand the concept of trigonometric ratios using the relationship between the sides and the angles of the right angled triangle.</p> <p>To recognize the values of sine, cosine, tangent and their</p>	<p>Topic : 6. Trigonometry</p> <p>1. Identities</p> <p>Able to identify the Trigonometric identities and apply them in simple problems.</p> <p>2. Heights and distances</p>

<p>reciprocals for specific angles $0^\circ, 30^\circ, 45^\circ, 60^\circ, 90^\circ$. To do simple problems based on these ratios.</p> <p>2. Complementary angles To use the concept of complementary angles in simple problems</p> <p>3. Trigonometric tables To understand the usage of trigonometric tables.</p>	<p>To apply trigonometric ratios to calculate heights and distances. (Not more than two right triangles; (Angles of elevation or depression should be $30^\circ, 45^\circ$ or 60°.)</p>
<p>Topic : 7.Measurement and Mensuration</p> <p>1. Area of a triangle Able to use Heron's formula (no proof) to find the area of a triangle. To apply the same idea to find the area of a quadrilateral.</p> <p>2. Surface Area and Volume of Cube and Cuboids To recall the 3 D shapes To find LSA , TSA and Volumes of cubes and cuboids.</p>	<p>Topic : 7.Measurement and Mensuration</p> <p>Surface Area and Volume of Solids To determine volume and surface area of cylinder, cone, sphere, hemisphere and frustum (hollow solids to be omitted). To compute Volume and surface area of (not more than two different) combined solids) Problems involving conversion of solids from one shape to another with no change in volume.</p>
<p>Topic : 8. Statistics & Probability</p> <p>Statistics:</p> <p>1. Histograms. To recall the collection of data, presentation of data in tabular form - ungrouped and grouped data. To recall histogram and frequency polygon To construct histograms (with varying base lengths).</p> <p>2. Measures of central tendency. To recall Mean, median, Mode of ungrouped data. Able to calculate the Mean, Median and Mode for grouped data.</p> <p>3. Probability</p> <p>Probability: an experimental approach To study probability through empirical approach by considering experiments to be drawn from real-life situations. Able to calculate the probability of events like tossing coins and throwing dice.</p>	<p>Topic : 8. Statistics & Probability</p> <p>Statistics</p> <p>1. Measures of central tendency To recall Mean for ungrouped and grouped data.</p> <p>2. Measures of dispersion To understand the concept of Dispersion. To understand and compute Range, Standard Deviation, Variance and coefficient of variation</p> <p>3. Probability:</p> <p>Probability-theoretical approach To understand Random experiments, Sample space and use of a tree diagram. To define and describe Events – Mutually Exclusive, Complementary, certain and impossible events. To understand addition Theorem on probability and apply it in solving some simple problems.</p>
